

Learn and Serve America 2007 Community Partner Survey

This survey is designed to help grantees gather evidence from community partners about the impact of service-learning. Many performance measures for Needs and Service Activities and Strengthening Communities refer to a certain percentage of partners or beneficiaries who will agree that service-learning benefited them in some way.

The generic questions below can be sent as e-mails by grantees to the community partners of subgrantees. Grantees can then tabulate the results and report them in progress reports to Learn and Serve America. Grantees who do this will have satisfied the requirement to gather evidence of impact for the Needs and Service Activities and Strengthening Communities performance measures.

Community Partner Name:

Strengthening Communities

Please rate the following items using a scale of:

1 for strongly disagree

2 for disagree

3 for agree

4 for strongly agree
